

ROBOTIC PARKING SYSTEMS, INC.

**Robotic Parking Systems Promotes Ramanathan Ramasubbu
to Chief Operating Officer**

Clearwater, Florida 7 March 2017 ---- Robotic Parking Systems is pleased to announce the promotion of Ramanathan (“Ram”) Ramasubbu to the position of Chief Operating Officer.

Mr. Ramasubbu holds a B.S. degree in Mechanical Engineering and has worked for the company for eleven years. In his prior positions as Senior Mechanical Engineer and Technical Manager, Ramasubbu rapidly gained experience in all phases of the production and operation of Robotic Parking Systems’ automated parking garages. He was involved in the design and build of the 765 space and 1200 space (current holder of the Guinness World Record for the Largest Automated Parking Garage) parking facilities in Dubai as well as instrumental in the design, installation and start-up of the 2350 space facility in Kuwait. Ramasubbu also lead the team implementing the processes and procedures required to pass the rigorous audit for the company to be ISO 9001:2015 Certified for the Design and Installation of Robotic Parking Systems.

In his new role as Chief Operating Officer, Ramasubbu assumes responsibility for design, engineering, manufacturing, software development, installation, operations and quality control of the company’s acclaimed high-capacity automatic parking garages. His past achievements and the wealth of experience gained are invaluable to the growth and continued success of the company.

About Robotic Parking Systems, Inc.

Founded in 1994, US-based Robotic Parking Systems Inc. pioneered the development of the high-capacity, scalable automated parking garage. A robotic parking system reduces the space needed for cars by 50% and creates more space for design and development. The speed and efficiency of its patented technology creates, for the first time, opportunities for projects requiring several hundred to several thousand parking spaces to profit from the space-saving, environmental and safety benefits of automated parking.
